

Wire and Line Lifting Systems for Heavy Loads

Code: YRLAE

DESIGNED FOR

Emergency Services personnel who may be called upon to apply lifting systems for heavy loads.

ENTRY CRITERIA:

- Familiarity with general application of lines and winches.
- Have received formal training in Health & Safety at work including manual handling.

Contact Outreach Rescue for further information before making nominations.

HEALTH AND SAFETY REQUIREMENTS:

Owing to the nature of the training, students must:

- Be fit for full operational duties in accordance with brigade requirements.

Personal equipment should include appropriate all weather outdoor clothing, safety gloves and footwear. No specialist equipment is required. Service uniform is not required.

AIM

To give students the underpinning skills and knowledge to safely lift heavy loads using bipod, tripod and monopod systems.

LEARNING OUTCOMES

After successful completion of the course, the student should be able to:

- Demonstrate the ability to operate a range of mechanical lifting equipment and associated hardware.
- Apply knowledge of rescue PPE equipment as to its use, care and application.
- Demonstrate the ability to apply the principles of load analysis to bipod, tripod and monopod systems.
- Apply risk assessments in a range of exercise scenarios.

DELIVERY MODE

By lectures and practical exercises. A course manual is issued.

ASSESSMENT & REPORTING

Continuous assessment is made in addition to a practical test. Results centrally recorded and entered in a personal Record of Performance.

CERTIFICATION

Students will receive joint Fire Service College and Outreach Organisation Certification upon successful completion of the course.

VENUE

Outreach Rescue, Llanllechid, Bangor, Gwynedd, LL57 3HY.
