

PAEDIATRIC ADVANCED LIFE SUPPORT (PALS), RECERTIFICATION

Goal:

To maintain the competence of healthcare professionals in paediatric emergency response, ensuring alignment with the latest international guidelines and best practices.

Target group:

This course is for; Healthcare professionals with a valid or recently expired ASHI PALS certification; emergency medical personnel, paramedics, nurses, and doctors in paediatric emergency care; and professionals requiring recertification to maintain international qualifications.

Highlights:

- Internationally recognised recertification for paediatric emergency professionals.
- Hands-on, scenario-based training to maintain real-world skills.
- Certification valid for 24 months, meeting global healthcare standards.

Description

The American Safety & Health Institute (ASHI) Paediatric Advanced Life Support (PALS), Recertification course is designed for healthcare professionals needing refresher training in paediatric emergency care. This globally recognised course reinforces the latest international guidelines for the assessment and management of paediatric medical emergencies. Delegates will refine their knowledge and hands-on skills through scenario-based training, ensuring they remain competent and confident in handling paediatric life-threatening situations. The course covers airway management, shock treatment, rhythm disturbances, and advanced resuscitation strategies, preparing healthcare professionals for emergency roles in hospitals, prehospital settings, and critical care environments worldwide. Upon successful completion, participants receive an ASHI PALS Recertification, valid for 24 months.

Compliance:

Fully aligned with American Safety & Health Institute (ASHI) guidelines, this training meets international standards for paediatric emergency response.

Previous knowledge:

Participants must have a valid or recently expired ASHI PALS certification and proficiency in ECG interpretation and cardiovascular pharmacology. A professional-level Basic Life Support (BLS/CPR/AED) certification is also expected.

Requirements:

To earn recertification, delegates will complete a written exam (minimum passing score: 71%) and provide a practical demonstration of emergency care skills in two randomly selected paediatric case scenarios.

Progression:

Further training and career development opportunities include advanced paediatric and neonatal emergency care courses and continuing medical education (CE) credits for emergency professionals.

Theoretical elements:

- Updates on paediatric emergency care guidelines and protocols.
- Review of respiratory and cardiovascular emergency management.
- Advanced techniques for airway management and medication administration.

Practical elements:

- Hands-on simulations of paediatric emergency scenarios.
- Training in rhythm recognition and electrical therapy.
- Practical application of updated resuscitation techniques.
