RESCUE TEAMS & SAFETY COVER

Goal:

To provide expert rescue and safety cover, ensuring compliance with legal requirements and enabling organisations to focus on operational goals.

Target group:

Organisations requiring external expertise to address gaps in safety and rescue capabilities.

Highlights:

- Experienced and certified personnel for high-risk environments.
- Customisable safety cover solutions to complement your workforce.
- Comprehensive support across height safety, confined spaces, and water hazard scenarios.

Description

Outreach Rescue offers professional rescue and safety cover services tailored to meet the demands of complex and high-risk work environments. With increasing legislative requirements and rising training costs, our solutions enable organisations to maintain compliance while focusing on core operations. Our experienced personnel can provide full-site safety teams or supplement your workforce with specialist expertise. Services include rescue team deployment, entry control duties, and task supervision in environments such as Confined Spaces, work at height, and areas with water hazards. Whether you need temporary cover or ongoing support, Outreach Rescue delivers reliable and effective solutions to keep your teams safe and your projects compliant.

Rescue Teams & Safety Cover

Certification

Customised documentation provided as required for compliance audits and reporting.

Venue

On-site at your project location or worksites, as required.

Compliance:

Aligned with all relevant workplace legislation, including Confined Space Regulations 1997, Work at Height Regulations 2005, and Health and Safety at Work Act 1974.

Previous knowledge:

No prior knowledge required; service integrates seamlessly with existing workforce.

Requirements:

Access to project details, risk assessments, and worksite environments to customise service delivery.

Progression:

Annual safety reviews and adjustments to service as project needs evolve.

Theoretical elements:

– Understanding legislative requirements for rescue and safety coverage.
– Overview of best practices for workplace risk management.
– Developing integration plans for external safety teams with existing workforces.

Practical elements:

– Deployment of site-based rescue teams for Confined Space, height, or water-related tasks.
– Supervision and entry control management for high-risk operations.
– On-site hazard assessments and real-time safety interventions.
