

MANAGING WORK AT HEIGHT

Goal:

To equip supervisors and managers with the skills and knowledge required to ensure the safe planning, supervision, and management of work at height activities.

Target group:

This course is for managers and supervisors that are responsible for planning, supervising and managing work at height.

This course is eligible for both CITB and ELCAS funding.

Highlights:

- Provides a clear understanding of the principles of work at height and associated risks.
- Includes practical assignments for planning and supervising work at height.
- Focuses on legislative compliance and best practices for managing high-risk tasks.

Understanding Planning, Supervising and Managing Work at Height, City & Guilds, 6144-31

Description

This two-day course covers health and safety regulatory requirements, selecting staff and equipment, producing work schedules and site supervision for work at height. The course is classroom-based, and firstly educates delegates in best practice for working at height, and then continues to how to produce suitable documentation for works. Delegates are assessed by means of a written exam and must produce an assignment. Successful delegates are suitably qualified for positions requiring supervision and management of activities involving work at height.
